Period of Significance: 1925  Property Type: Multi-family Resident  Applicable Criteria:  A/1, C/3

(Review importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The Egyptian Revival Karnak Apartments were constructed in 1925 for owner A.S. Tyler of 241 N. Western Avenue at a cost of $50,000. The architect and contractor were J.M. Close of the same address. J.M. Close also designed several of the Karnak's "twins", including the Ahmed Apartments, located within the Hollywood Redevelopment Area at 5616 Lexington Avenue, the Sahara Apartments, located at 1020 S. Kingsley Drive, and a 2-story mini-version of the same building located immediately across the street from the Sahara Apartments. John M. Close was an architect, contractor, and real estate broker. He is listed in the 1920 Census as 38 years old, from New York, residing at 1807 Vernon Avenue,...

(This space reserved for official comments.)
B10. Statement of Significance (continued): married to Edna R. of California, with one son and one daughter.

According to the 1930 Census, approximately 12 of the residents of the Karnak worked in the motion picture industry, employed as actors, musicians, and art directors. In addition, among the early residents of the Karnak was Jose Samaniego, Spanish artist and editor of the Prensa de Madrid, a leading illustrated weekly publication in Spain, who lived at the Karnak while visiting the Hollywood area for one year to study American filmmaking as a representative of the Spanish government ("Spanish Artist on Visit Here", LA Times 28 Feb 1931, A5).

The Karnak Apartments appear significant both as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population as well as for its relatively rare and distinctive architectural style. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typically four or five stories tall, they were usually constructed of brick or of reinforced concrete and were generally designed to fill as much of the lot as feasibly possible with configurations in the shape of an U, L, T or barbell.

Designed in an Egyptian Revival style, the property exhibits character-defining features of the style, including a monolithic structure with lotus-topped pilasters and Egyptian iconography. The style represents an exuberant period of expansion during the 1920s fueled by the explosive popularity of motion picture industry. Not only was the property inhabited by residents connected to the motion picture industry, the building itself provided entertainment for passers-by that invited their participation and reproduction of the city's self-image as a playful, fantastical paradise.

B10. Significance: Area: Los Angeles Theme: Residential Development and Suburbanization, 1913-1945

Period of Significance: 1930 Property Type: Multi-family Residence Applicable Criteria: A/1, C/3

In 1929, a permit was issued to owner Raymond J. O'Brian for erection of an 80-room, 40-family apartment building and parking garage at 5611 Carlton Way. The architect listed on the permit is O. Schiller and E.J. Davis. The contractor was C.C. Overpeck of 430 S. La Brea. Total valuation of proposed work was $125,000. Sanborn Maps (corrected through 1951) label the building located at 5611 Carlton Way "Bryn-Carlton Apts" and note that the 5-story Bryn-Carlton contains 40 apts and a garage for 40 cars. In 1931, the building was purchased by the Calan Corporation, Ltd. of the Richfield Building as part of a larger purchase of seven Class A apartment buildings in Hollywood and Wilshire...

(This space reserved for official comments.)
B10. Statement of Significance (continued): sections of the City for approximately $2.2 million. Included in this purchase was the Villa Bonita, located at 1517 Hillcrest Road in Hollywood, just North of the Hollywood Redevelopment Area. According to the 1936 Los Angeles City Directory, the property manager was Frank D. Gardner.

This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of this property type, the building is five stories tall, constructed of reinforced concrete and designed to fill as much of the lot as feasibly possible.

This property also appears significant for its flamboyant architectural design in an Art Deco style. The property exhibits character-defining features of the style, including smooth stucco wall surfaces decorated with zigzags and other stylized geometric motifs, and pilasters emphasizing verticality. Though comparatively rare, and in vogue for not much more than a decade, this style was highly influential because it embodied the integration of four unlikely features unique to Los Angeles: changing patterns of land use; a popular response to early 20th Century progress and technology; the birth of new industries; and a sense of fantasy fueled by Hollywood and the movie industry that propelled the City's myths and legends.

B10. Statement of Significance (continued): individual listing in the National Register for its association with Hollywood as a night-time entertainment center. For $1, up to a 1,000 people could dine on a six-course dinner and dance in what appeared to be an open-air garden. Later, glamour gals in a chorus line revealed a bit of flesh and customers lined up seven days a week to ogle and participate in the sophisticated stage show. Whereas the Sunset Strip featured many upscale nightspots, Hollywood had more of the working class nightspots and the Florentine Gardens was one of them. The Florentine Gardens went bankrupt in 1948.

Year constructed: 1933

**B7. Moved?** No

**B8. Related Features:**
None

B9a. Architect: __________

b. Builder: __________

**B10. Significance:**

**Area:** Los Angeles

**Theme:** Radio Broadcasting, Television Production, and Recording, 1946-1964

**Context:** Entertainment Industry, 1946-1964

**Period of Significance:** 1961-1985

**Property Type:** Commercial

**Applicable Criteria:** A/1

(Describe importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant for its association with United Western Recorders, who purchased the property in 1961. The United Western Records complex also included the building two lots away at 6050 Sunset Boulevard, which also functioned as a recording studio. United Western Recorders has arguably been the scene of more hit records - from the 1950s until the present - than any other studio in America. Among those who have recorded there include Nat "King" Cole, Barbra Streisand, Whitney Houston, the Rat Pack of Dino, Frank Sinatra, Bing Crosby; Ray Charles, the Stones, Elton John, Eric Clapton, Torn Petty, R.E.M., k.d. lang, and Bonnie Raitt.

Recording studios were designed as...(continued on next page)

(DPR 523B (1/95) *Required Information)
B10. Statement of Significance (continued): private, functional spaces to accommodate artists as they worked in recording sounds, whether for incorporation into films or as music for record production. With the new technological innovation of magnetic tape and its introduction into the recording industry in the 1950s, the spatial requirements for a recording studio became much more flexible than they had been previously. The technological development of magnetic tape for sound recording allowed records to be recorded almost anywhere. Because of the flexibility inherent in the recording process, many of the recording studios were located in buildings not originally built to accommodate them but previously used for some other commercial enterprise. Another factor that affected the flexibility with which recording studios could be located was that the physical production of records was separate from the production of the music placed upon them; while music was recorded in these buildings, it was not the location where records were physically made. Instead, the recording would be made on the premises and then sent elsewhere to press.

Despite the stature of some of personalities that recorded their significant work within the recording studio building type, many of these buildings are characteristically rather unremarkable architecturally. In fact, the consistently non-descript architectural expression of recording studios, as buildings not otherwise distinguishable from the common everyday landscape, suggests that the location of recording studios in small, architecturally unarticulated commercial buildings might have been an intentional strategy to create a working environment conducive to the musicians working there.

Prior to its use in the recording industry, in 1943, the building was called the "Hollywood Casino" and was home to theater productions such as "Burlesque in Hollywood" and "Harlem in Hollywood." ("Directors Collaborate," Los Angeles Times, 16 Apr 1943, 17; "Display Ad 3," Los Angeles Times, 20 Nov 1943, 3). The building also housed West Coast Productions in 1950 and was called the "Radio Center Building" in 1954. ("Eight on Trial in Alleged TV Union Racket," Los Angeles Times, 9 Nov 1950, A8.)

In 1954, the building was called the "Radio Center Building" and was valued at $300,000 in a real estate transfer from the Radio Broadcasting Recording & Service Corporation to Wagner Realty Co. ("Large Volume of Deals Told," LA Times, 10 Jan 1954, F4).

B8. Related Features: None

Context: Architecture, Engineering and Designed Landscapes, 1913-1945 Theme: The Architecture of Fantasy--Period Revival Styles, 1910-1940

Period of Significance: Property Type: Applicable Criteria: C/3

This brick-wall, 5-room commercial building for stores was erected for owner Bedell and Company of 451 San Fernando Road at a cost of $11,000 Permit No. 26396 (1928) for a 5-room commercial building for use as stores.

This property appears significant as an important example of Italianate architecture as well as for its association with important local architect Henry Hayden Whiteley. The property embodies distinctive character defining features of Italianate architecture, including a low, octagonal hipped roof with a cupola over a corner tower that also features a wrought lion lantern and grill, parabolic-shaped openings flank corner, and plaster corbels.

Henry Hayden Whiteley... (continued on next page)

None

**B10. Significance:**  Area: Los Angeles  Theme: 

**Period of Significance:** 1932  **Property Type:** Commercial  **Applicable Criteria:** A/1, C/3

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

According to the 1936 Los Angeles City Directory, early tenants of the building included: Franklin Liquor Company (6324 Yucca), L L Emery (632 Yucca), a clothing cleaner operated by Louis Bachrach (6318 Yucca), real estate office for Rolland Carr, post office carrier Arthur Frazier and wife Mrs. B Frazier's corsetieres business (6314 Yucca).

This building appears significant both as a commercial building constructed within an emerging commercial center as well as for its design in an Modern style. This building is associated with development of "Peacock Alley," a specialty shopping district concentrated on Vine St between Yucca St and Hollywood Blvd. The first building constructed...(continued on next page)

B13. Remarks:

**B14. Evaluator:** Jenna Snow

**Date of Evaluation:** 01/28/2009

(This space reserved for official comments.)
B10. Statement of Significance (continued): as part of Peacock Alley was the Jean Swartz building, constructed in 1930 and located on the southeast corner of the intersection of Yucca and Vine. Peacock Alley was one of several Vine street development projects planned as part of the City's "Five-Finger Plan," a public works project to improve areas surrounding Hollywood Blvd. According to a 1937 map of the Pacific Electric Railway, Peacock Avenue was located along the Western and Franklin Avenue Line Route, which operated from a downtown terminus at 11th and Hill Streets, collecting Yucca and Vine Streets on the way to its terminus at Vine and Hollywood Blvd. The line operated from 1911 to 1940.

Designed in the relative rare Zigzag Moderne style, the property exhibits character-defining features of the style, including smooth stucco wall surfaces decorated with stylized geometric motifs and pilasters emphasizing verticality. Though comparatively rare, and in vogue for not much more than a decade, this style was highly influential because it embodied the integration of four unlikely features unique to Los Angeles: changing patterns of land use; a popular response to early 20th Century progress and technology; the birth of new industries; and a sense of fantasy fueled by Hollywood and the movie industry that propelled the City's myths and legends.

DPR 523L (1/95) *Required Information
**Historic Name:** Earl Carroll Theatre Restaurant, Moulin Rouge, Hullabaloo, Aquarius Theatre

**Original Use:** Theatre-restaurant

**Present Use:** Nickelodean Studios

**Architect:** Gordon B. Kaufmann

**Builder:** Ford J. Twaits Co.

**Area:** Los Angeles

**Period of Significance:**

**Property Type:** Theater

**Applicable Criteria:**

The 3-story building currently occupied by Nickelodean Studios at 6230 Sunset Blvd was originally designed by architect Gordon B. Kaufmann in 1938 as the Earl Carroll Theatre Restaurant, a dinner theatre, constructed at a cost of $500,000. The owner listed on the building permit for erection of the restaurant was Inner Circle Corporation of Bank of America Building, Beverly Hills, the contractor was Ford J. Twaits Co. of 816 W. 5th Street, and the engineer was Murray Frick. (LA Building Permit No. 28015). Originally designed with a double revolving stage and three subsidiary stages, the building was, at the time of construction, convertible into a broadcasting station as occasion...(continued on next page)

**References:**

**Evaluator:** Tanya Sorrell

**Date of Evaluation:** 12/18/2008

A previous Historic Resources Survey performed in 1979 offers the following building description: "Known for its revues, the theatre offered lavish burlesque-like shows with dinners. Designed by Gordon B. Kaufmann, the interior featured a colorful neon ceiling, an art moderne lobby, and a statue holding a neon tube. The exterior had a neon face with the words, "Thru these doors pass the most beautiful girls in the World." The blank wall facing the street once was covered with star signature plates. These plates are now in the basement of the building. The building still has one of its most unusual features; a revolving round stage inside another round revolving stage. The building effectively combines International and Moderne styles. Designed around a parking lot with a side entrance, the once present neon face was all that was visible in the evening. The theatre later became the Moulin Rouge" (Denver Miller, Christy Johnson, 10/1979).

Another previous Historic Resources Survey form for the building elaborates: "The resource was built as a dinner theater by Earl Carroll, a brash entertainer who started his career as a Broadway writer, producer and director who had the distinction of introducing full nudity to the Broadway stage...The theater equipment, including a revolving staircase and a rain machine, were some of the most complex for their time. Earl Carroll died in 1948 in a plane crash, and later in the 1960s, the theater was revived as the "Hullabaloo", a popular Rock 'n' Roll venue (Catherine Barrier,

**Context:** Commercial Development in the Early 20th Century, 1913-1945

**Period of Significance:** 1938

**Property Type:** Commercial

**Applicable Criteria:** C/3

The sign at 6260 Sunset Boulevard appears particularly significant, with its sign integrated into the design of the building. Constructed in 1938, likely designed by Rudolph Schindler, design of the sign appears heavily influenced by the Bauhaus School. Many types of signage utilized on buildings during the period of significance derive from signage practices conceived in the nineteenth century. The rise of urbanism and the competitive marketplace that emerged with the mass production of industrial goods prompted business owners to seek new ways to distinguish their businesses from those of others. Due to developments in transportation in the first decades of the twentieth century,...(continued on next page)

B9a. Architect: John A. Anderson (architect/engineer) b. Builder: not selected at time of permit issue

*B10. Significance: Area: Los Angeles Theme:

Period of Significance: 1967 Property Type: Office Building Applicable Criteria: C/3
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

In 1967, a permit was issued to owner Home Savings & Loan of 1500 Vine St to construct a 2-story Home Savings & Loan office building at the same address. The architect/engineer was John A. Anderson. Total valuation of proposed work was $265,000 (LA Building Permit No. 46145).

The Home Savings and Loan building appears eligible for listing in the California Register for its distinctive design. Designed in a late International Style, the building was designed by Millard Sheets in partnership with architects Langdon and Wilson. The building integrates rich materials, such as travertine, banded black marble, and mosaic tile. Millard Sheets may best be known for his designs of over 40...(continued on next page)

B1. Historic Name: Palacio Apartments/The Julie Lee

B2. Common Name: 1665 N Sycamore Ave

B3. Original Use: Multi-family Residential B4. Present Use: Multi-family Residential

B5. Architectural Style: Italianate

B6. Construction History: Year constructed: 1926

B7. Moved? X No ___ Yes ___ Unknown Date: ___________ Original Location: ___________

B8. Related Features: None

B10. Significance: Area: Los Angeles Theme:

Period of Significance: 1926 Property Type: Multi-family Residential Applicable Criteria: A/1, C/3

Although new construction building permits were not found with this APN, the 1929 Los Angeles City Directory refers to the building located at 1655 N. Sycamore Ave as the "Palacio Apartments." Mattie Moore is listed as the manager of the building. Another manager, Fred R Neubert (wife Caroline) is listed as the houseman. The earliest permits available for this APN are building alteration permits from 1941. These permits note that the building was being used as a 40-family, 80-room apartment building. This apartment building appears significant as an excellent example of a property type that represents an important pattern of dense, urban development to accommodate a rapid increase... B11. Additional Resource Attributes: (List attributes and codes) HP03

B12. References:

Los Angeles Department of Building and Safety, Permit Nos. 8874, 10049. 1929 Los Angeles City Directory

B13. Remarks:

B14. Evaluator: Jenna Snow

Date of Evaluation: 11/04/2008
B10. Statement of Significance (continued): in population. Despite the pervasive American ideal of single family ownership evidenced at the turn of the twentieth century, there was, nonetheless, a growing trend in large cities across the nation towards people living together in collective dwelling arrangements. Initial, the communal living arrangements of apartment living aroused much suspicion among the middle class as being morally suspect, a concern from which Hollywood was not immune. During the 1920s, Hollywood was undergoing rapid urbanization parallel with a significant rise in population density and apartment housing became an increasingly attractive option to both prospective tenants as well as to speculative land developers. Typical of the building type, this building is five stories tall, constructed of brick and designed to fill as much of the lot as feasibly possible with configurations in the shape of an U.

This building also appears to be a particularly fine example of Italianate architectural style. Characteristic of the style, the building has a base-shaft-capitol composition. The terra-cotta clad shaft, which included the first two floors, is constructed to appear as dressed stone with an arched, inset, centrally located main entry surrounded by decorative, floral terra-cotta. Terra-cotta shields also appears in the spandrel panel between first and second floor windows, while terra-cotta vases are set within the segmental arch above second floor windows.

The Seventh-Day Adventist church, located at 1711 N Van Ness Ave in Hollywood, was formally opened July 7, 1962. The minister at this time was C. Lloyd Wyman. The church contained seats for 650 people and was built at a cost of $460,000. Architects Burman & Rasmussen of Glendale, are also responsible for the design of another Seventh-Day Adventist church in Glendale, located at 311 Vallejo Drive, built at a cost of $90,000. Both churches had their groundbreaking ceremonies the same day, May 28, 1961. Burman & Rasmussen are also responsible for the design of the Armenian Protestant church located at 3500 Cahuenga Pass (extant).

The church appears significant for its unique Modern... (continued on next page)
B10. Statement of Significance (continued): architectural design. Typical of the buildings of this period, the church is masonry construction, which allows for a main, orthogonal portion with a more expressive, circular portion within and atop. An interesting comparison can be made between this building and Le Corbusier's church Notre Dame du Haut in Ronchamp, France (1954). The principal guiding design feature in both buildings are techniques to control light in the interior, including small, pierced openings on the tower overhanging the Hollywood Freeway and larger windows along the Hollywood Boulevard elevation shaded by brise-soliel, or louvers.

DPR 523A (1/95)  
*Required Information
P3a. Description (continued): medium, setting, location, workmanship, association, feeling **H) Setting (immediate):** driveway
In 1922, a permit was issued to owner Mr. Max Shur of Santa Monica and Western for erection of a 2-story, 16-room, 4-family flat located at 1259 Tamarind. Total valuation of proposed work was $8,000. (LA Building Permit No. 27023).

This flat is significant as an increasingly rare example of a formerly ubiquitous property type in Hollywood that represents an important pattern of dense, urban development to accommodate a rapid increase in population. Well into the 1920s, apartment buildings of any kind were typically viewed as an intrusion within areas previously established as neighborhoods comprised of single family residences. Perhaps because of the resistance towards apartment...(continued on next page)

*B14. Evaluator: Tanya Sorrell

*Date of Evaluation: 12/10/2008

(This space reserved for official comments.)
B10. Statement of Significance (continued): buildings during this period, a couple of different strategies were employed to make the primary façade appear more like a single family residence. This property, designed in a Mediterranean Revival style, articulates decorative elements of the primary façade with a visual cohesiveness suggestive of a single family residence.

Context:  Architecture, Engineering and Designed Landscapes, 1913-1945  Theme:  The Architecture of Fantasy--Period Revival Styles, 1910-1940

Period of Significance: 1913  Property Type: Single Family Residence  Applicable Criteria:  C/3
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This property appears significant as an important example of the Craftsman style. Popular from the early 1900s through the 1920s, the Craftsman style utilizes design elements of the Arts and Crafts style and represented a conscious search for the supposed simplicity of pre-Industrial times. The bungalow's simplicity of form, informal character, direct response to site, and extensive use of natural materials, was a regional interpretation of the socio-economic and aesthetic reforms espoused by the Arts and Crafts Movement's founder, William Morris. Although modest in size, this property demonstrates most character-defining features, including most significantly, a low-pitched roof with...(continued on next page)

DPR 523A (1/95) *Required Information
A permit was issued in April of 1962 for erection of a market - retail sales building located at 1341 Vine Street for owners Mr. and Mrs. I. Mills of 1800 N. Argyle Avenue. The total valuation of the project is listed as $300,000. The architect is Maxwell Starkman and the licensed engineer is Eugene Birnbaum. The original building permit contains an attached site plan which labels the proposed building as "Food Giant Market," indicating that Food Giant Market was the first store to occupy the building. The contractor is "unassigned." A 1962 Los Angeles Times article reported on the opening of Food Giant Market.

This building appears significant for its exemplary architecture in a...
B10. Statement of Significance (continued): Mid-Century Modern style and for its association with important local architect Maxwell Starkman. What is now known as Mid-Century Modern architecture was a continuation of Modern movements that came earlier and much is an amalgamation of architectural expressions from an earlier period, including the International and Bauhaus styles. The most notable architects combined new architectural solutions to integrate traditional precedents into a style that moved the entire field of architecture, and sometimes public consciousness, in a new direction. Modernism became the pre-eminent design solution from about 1932 to about 1984 for commercial buildings. While they were largely unsuccessful in convincing developers to adopt the modern style for residential buildings, Modern architects found commercial clients who were willing to adopt a modern style to distinguish their buildings. This building embodies International Style tenants with a large glass facade set back from columns which support the roof structure. Two pods clad in glazed tile are located on either side of the facade.

DPR 523A (1/95) *Required Information*
In 1968, a permit was issued to owner Stanley Folb of 6565 Sunset Blvd for erection of an 11-story office building and parking garage located at 6464 W Sunset Blvd. Total valuation of proposed work was $2,700,000. Early tenants of the building included Motown Record Corp/Motown Productions Inc. and Columbia Artists Management, Inc. The majority of building tenants in 1973 were music recording companies. Remaining tenants worked other areas of the entertainment industry (film, media consulting, etc.) and a small portion of tenants were non-industry professionals, such as doctors.

Orange Julius of America leased 10,500 square feet of office space in the building for its new national...(continued on next page)

This building appears significant for its exceptional architectural design in a Late Modern style. With its base constructed on piloti and split concrete panels and a curtain glass wall shaft slightly separated from the base, this building thoroughly incorporates tenants of the Corporate International Style. The style is derived from the rectilinear designs of Ludwig Mies van der Rohe, one of the three leading architects of the International Style in the 1930s. Mies’s post-WWII designs in America moved toward using more unified, modular patterns that emphasized the separation of the walls from the overall structure. Corporate International buildings are characterized by the use of exposed steel piers and I-beams on a rectilinear form, a curtain wall composed of horizontal bands of windows that are often interspersed with horizontal bands of an alternate material such as brick or tile.

Although the building housed a variety of tenants, including a proliferation of tenants associated with the recording industry in the 1970s, this connection appears tenuous to convey significance to the property.

Local architect Abraham Shapiro designed several other buildings throughout Los Angeles, including 8383 Wilshire Boulevard (1970) and Yavneh Hebrew Academy at Beverly Boulevard and Fuller Street (1964, no longer extant), this appears to be his best work.

(Describe importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)  
This property appears significant as an excellent example of an increasingly rare property type. Single family residences from the pre-annexation period of Hollywood appear particularly significant as an important pattern of development, illustrative of Hollywood's early development as an independent city. Although residential development began a few years earlier, Hollywood became an independent city in 1903. By 1909, Hollywood experienced growth on an exponential scale, with a population increase of 700 in 1903 to 4,000 in 1909 and accompanying difficulties supplying services to residents. As a result of its growing pains, Hollywood became a district of Los Angeles in February of...(continued on next page)

**P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

- A) Property Type: residential
- B) Setting (general): residential area
- C) General characteristics. Architectural Style: Wood-frame Vernacular
- Plan: rectangular
- No. of vertical divisions: 2
- No. Stories: 2 buildings
- Siding/Sheathing: wood: clapboard, All Visible
- Roof: side gable, steep, wide eaves, decorative venting under gable peaks
- Construction: wood frame
- D) Specific features
- Porches: Partial, front, enclosed, altered: yes
- Fenestration: wood, double-hung, front
- Primary Entrance: front, single door, recessed
- Dormer: front
- E) Important decorative elements.
- Decorative Elements: brackets
- G) Alterations or changes to the property. Retains integrity: medium, setting, location, materials, workmanship, association,...(continued on next page)

### *P3a. Description:*

(Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

A) Property Type: Residential
B) Setting (general): Residential area
C) General characteristics. Architectural Style: Craftsman, modest
Plan: rectangular
No. of vertical divisions: 3
No. Stories: 1
Siding/Sheathing: wood: clapboard, All Visible
Roof: side gable, low, multiple rooflines, narrow eaves, decorative vergeboards/fascia
Construction: wood frame
D) Specific features. Porches: Partial, front
Fenestration: vinyl, horizontal sliding, front, side, arranged in trios, alteration: yes
Primary Entrance: front, single door, alteration: yes
Chimney: front
Other notable features: chimney truncated, porch columns altered
H) Setting (immediate): mature landscaping, driveway, fences
