

MAKING SURVEYLA EVALUATIONS

Using the California Register of Historical Resources Status Codes

The California State Office of Historic Preservation has developed California Historical Resource (CHR) Status Codes as a standardized system for classifying historical resources in the State's Historic Resources Inventory. These Status Codes are used statewide and are assigned to properties and districts by field surveyors as part of the survey process. Field surveyors apply the following CHR Status Codes when evaluating properties for SurveyLA.

3S – Appears eligible for National Register as an individual property through survey evaluation

3CS – Appears eligible for California Register as an individual property through survey evaluation

5S3 – Appears to be individually eligible for local listing or designation through survey evaluation

6L – Property identified through the SurveyLA process as ineligible for National Register, California Register or local designation; may warrant special consideration for local planning

6LQ – Determined ineligible for local listing or designation as a historic district through a survey process; neighborhood or area may warrant special consideration for local planning. This Status Code is used for Planning Districts.

6Z – Found ineligible for National Register, California Register or local designation through survey evaluation

7RQ – Individual property identified in a SurveyLA Survey – Not evaluated

This status code is used to identify properties that were considered during the field survey process, but were not recorded as significant based on the following: 1) field observations regarding the overall quality of the resource and alterations and/or 2) no preloaded information relating to the social, cultural or historical significance of the resource was obtained through SurveyLA research or the Public Participation and Outreach Program. A 7RQ status code does not preclude that a resource may be found to be significant with additional research, new information, and analysis.

7SQ – Individual property assessed for significance in accordance with the SurveyLA Multiple Property Documentation approach and citywide Historic Context Statement, but does not meet eligibility standards.

QQQ – Properties requiring additional research to evaluate or that cannot be evaluated due to limited or no visibility
